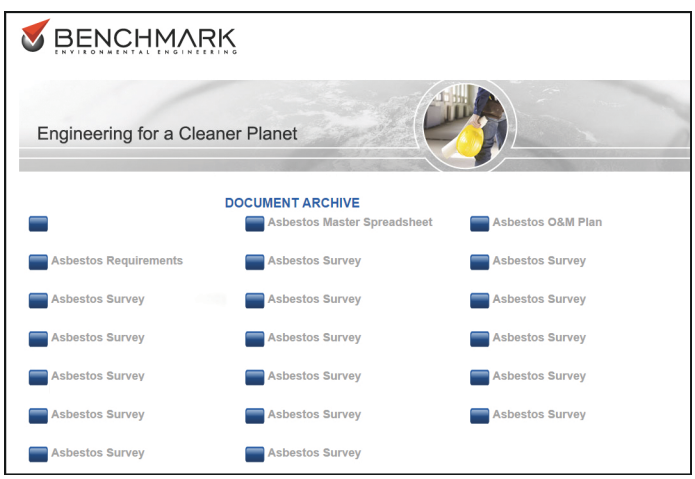
Data Management System

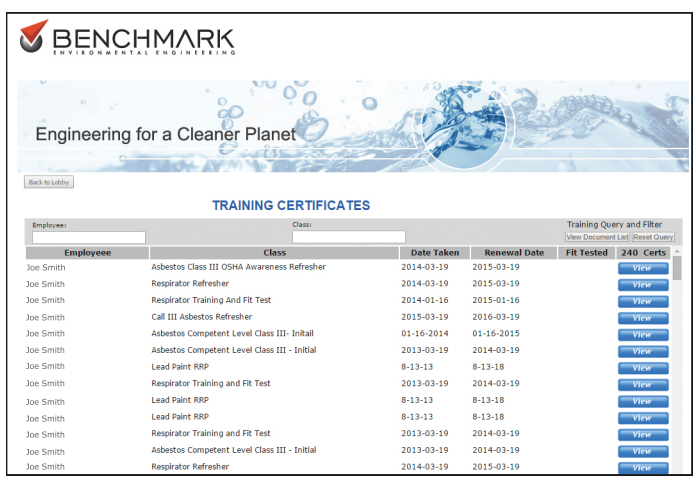
Benchmark Environmental Engineering provides a user-friendly Data Management System to help clients manage their inspection data, employee environmental training certificates and environmental documents as needed on a protected shared system. Clients can register and login on our website. We provide this service free of charge.

Simple **Dashboard** to access all of the areas you need.

Access to **Site Inspection Reports** with sorting options.



Easy to use **Document Archive** to download shared documents.



View and print **Training Certificates** for employees.
