

Training Services

Benchmark Environmental Engineering Training Classes provide education to a wide range of professionals in numerous industries nationwide.

Students will take home a certification, comprehensive training guides, up-to-date and practical knowledge on industry changes, and updates on regulations and guidelines.

LEAD-BASED PAINT

Renovation, Repair & Painting (RRP) - Initial (8 Hours)

- The EPA's RRP Rule requires contractors and/or maintenance staff working on pre-1979 properties to have the RRP Training Certification.
- This class is an 8 hour course with a refresher required every 5 years.

Renovation, Repair & Painting (RRP) - Refresher (4 Hours)

- This training course required by the EPA will refresh the renovator's knowledge of how to properly perform lead safety work practices.
- This class is a 4 hour course required every 5 years prior to your anniversary date. Renovators must have completed the 8 Hour Initial Training prior to attending this course.

OSHA COMPLIANCE

Hazardous Communication (4 Hours)

- This training course is for employees prior to exposing them to a potential workplace hazard. This class also meets OSHA requirements to inform employees of their right to a safe and healthful workplace.

PERSONAL PROTECTIVE EQUIPMENT

Respirator Fit Training (2 Hours)

- Required for anyone who wears a respirator.
- Must have medical documentation of a pulmonary physical completed prior to class.
- A respirator is provided.

ASBESTOS

Class III - Competent Person (16 Hour)

- Designed for employees that oversee asbestos projects involving repair and maintenance activities where the operations could exceed the Permissible Exposure Limit.

Class IV- Awareness (2-4 Hours)

- Designed for maintenance and custodial related occupations where employees may come into contact with, but do not disturb Asbestos Containing Materials or Presumed Asbestos Containing Materials.

MOLD & FUNGI

Mold and Fungi Awareness Class (3 Hours)

- Designed for employers, managers, supervisors, maintenance, janitorial staff, engineering and construction trades that may come in contact with water damage, construction defects, flood, etc.
